

DECORATE YOUR PLANET

Newcastle
University

Decorate your planet however you like, or try to recreate one of the planets on the table. Here's some ideas you might want to try

For a rocky surface, coat your planet in glue and roll it in sand

To add ice caps to your planet, add some glue and roll in glitter

Want to add a moon? Carefully push a cocktail stick into your planet. Colour a cotton ball with pen, and glue it to the cocktail stick

For clouds, pull apart a cotton ball and glue the wisps to your planet

Add rings: Cut out a circle of paper or foil, and cut a hole in the centre larger than your planet. Push a skewer all the way through your planet, and cut it to size. Tape your paper ring to the skewer

Add details with pens, paper cutouts, and glitter. Does your planet have seas and continents? Are there craters like our moon, or storms like Jupiter and Saturn?
